Hybrid Digital Free Form Sun
with Frame wrap of 0°

Hybrid Digital Free Form Sun
with Frame wrap of 15°

With Hybrid Free Form SUN you receive optimal protection from harmful rays while easing eyestrain and fatigue. Polarized lenses are the best option for eliminating glare and harmful rays. Lenses are available in tinted, mirrored or polarized to fit your lifestyle. Can be made with single vision or progressive Rx's or with no power at all. Frames with wrap of 10° or more should be ordered with wrap compensation(\$15). Most "WRAP" frames have 15° to 20° of wrap. To get the full benefit of Hybrid SUN- be sure to specify "With wrap comp." Plus, we have the ability to compensate for pantoscopic tilt and vertex distance if you provide us the numbers. Those two compensations are included in the wrap comp. price.
